### Care and Maintenance

Our boards and blocks don't have a finish on them, so everyday use only cuts or scratches the wood instead of damaging a finished surface. That being said, our boards and blocks are especially easy to maintain and keep looking beautiful. I offer a no frills guarantee for the life of the board. If you have a problem with the board, just contact us directly and we'll replace the item. Easy as that.

Do NOT put these in the dishwasher! The heat and aggressive wash will damage the product and void the warranty.

1. Wash with soap and water.
2. If you only use your board occasionally (once every three months or so) apply mineral oil as needed to maintain luster. (If you use your board in everyday use, you can use olive oil to maintain shine and luster.)
3. Let dry.
4. Enjoy!
